

Student Consent and Disclosure Form – Clinical/Externship

FVI School of Nursing and Technology does not require immunization records for classroom instruction. However, healthcare facilities require clinical faculty and students to be vaccinated to participate in clinical or externship experiences, which are mandatory for certain programs.

Programs requiring clinical/externship participation:

- Associate of Science in Nursing
- Practical Nursing
- Patient Care Technician
- Medical Assistant
- Nursing Assistant/Home Health Aide

The School cannot grant exemptions for vaccinations, as healthcare facilities set their own requirements. FVI has agreements with these facilities, and students must follow their policies to participate.

By signing this form, you:

1. Consent to provide your immunization records to FVI School of Nursing and Technology.
2. Allow FVI to share your immunization records with affiliated healthcare facilities for clinical or externship approval.
3. Agree to follow all instructions and policies set by the healthcare facility where you are assigned.
4. Understand that without completing a clinical or externship experience, this will prevent you from completing your program.
